About

I am Ravan Ismayilov, a Front-End Developer working with modern web technologies. I possess skills in HTML, CSS, JavaScript, React, Angular, and various CSS frameworks (Tailwind CSS, Bootstrap, Material UI). I am known for creating user-friendly interfaces and adhering to responsive design principles. I enjoy mentoring students and sharing my knowledge while effectively collaborating in a team environment. I strive to enhance project success with informed and creative approaches. I am always eager to learn new technologies and continue my personal development. Additionally, I am interested in pursuing Back-End development and mobile application development.

Work Experience

Front - End Developer : Mentor

06/06/2024 - 06/10/2024

Coders Azerbaijan

Teaching Front-End technologies (HTML, CSS, JavaScript, React, etc.) to students.
Providing practical experience through working on live projects.
Advising students at various levels on coding skills and best practices.
Reviewing and improving projects and code.
Developing and implementing teaching and training strategies.
Offering personal mentoring and support to help students develop their individual skills.

Front-End Developer : Intern

11/07/2024 - 11/08/2024

MyMentor Internship and Development Agency

Participated in the development of projects using technologies such as HTML, CSS, JavaScript, and React.
Created UI components and optimized user interfaces.
Developed and improved web pages according to responsive design principles.
Enhanced code performance and efficiency by working on real projects.
Engaged in code improvement and debugging processes.
Collaborated with the team to support timely project delivery.

Front - End Developer : Event

23/10/2024 - 31/10/2024

ChatGPT - 4o Hackathon

Worked as a Front-End Developer in a team during a two-day hackathon.

Contributed to creating interactive and user-friendly interfaces using React and CSS.

Collaborated closely with the team for idea exchange and problem-solving to accelerate project development.

Enhanced problem-solving skills by applying creative thinking and innovative approaches.

Front - End Developer : Event

23/10/2024 - 31/10/2024

Green Hackathon

During the two-day Green Hackathon, I contributed to Front-End development as part of the team.

Utilizing React and CSS, I helped create eco-themed, user-centric interfaces.

I collaborated closely with the team, engaging in idea exchange and contributing to solving various challenges to ensure smooth project progression.

By applying creative approaches and innovative solutions, I enhanced my problem solving skills and supported the skill development of my team members.
